

## summary

A motivated and tech-savvy developer, I mainly spend my time on experimenting and learning new things, I'm very curious about how anything works so I dig deep into research and into the web to be able to understand and implement my new expertise to more projects. I'm very aware of how web hosting works (cPanel/WHM & more), operating systems (Linux, etc.), I can also (partially) code websites with HTML & develop Minecraft plugins with PHP.

You can check out more of my skills in my website (<https://captainduck.me>)

## hobbies & interests

1. Linux System Administration
2. Developing and/or owning my own Minecraft: PE Server (<https://legendsbe.net>)
3. PHP Development (Programming Language used to develop plugins for my server.)
4. Web Development
5. Website Hosting

## professional skills
